

ARABIAN NIGHTS

Game Type: Video Slot Game

Return to Player: 95.62%

Arabian Nights is a 5-reel, 3-row, 10-line (fixed) video slot with an Arabian theme featuring Wild and Scatter symbols, free bonus spins and a progressive pooled jackpot.

Video slot themes are often imaginative and adventurous, and Arabian Nights is no exception: it sweeps the player away with symbols reminiscent of the world of Arabian Nights in the Islamic world of the ninth to thirteenth centuries.

GAME DESIGN

Main Game

Game Theme and Graphics

The game takes you back to the medieval world of Middle East symbols and design like a magic lamp, a desert camel, and a gem dealer.

The Middle Eastern style music, together with the big win dancers, make this game more exciting and interesting.

Main Game

Players can select the coin value and bet level before starting the game round.

Game actions

The buttons on the key pad perform the following different game actions:

	<p>Clicking the left and right arrows increases and decreases the bet level (i.e. number of coins per bet line) by 1. To increase or decrease faster, the player can click and drag the slider below.</p>
	<p>Clicking the Spin button starts a game round at the current bet level and coin value.</p>
	<p>Clicking this button changes the bet level to 10 and starts a game round.</p>
	<p>Clicking the left and right arrows increases and decreases the coin value to the next level.</p>
	<p>Players can open the Autoplay options window by clicking this button.</p>

Wild Symbol

Wild Substitution

The gem dealer is a Wild symbol that can substitute for any other symbol to complete a winning bet line, except for Scatters and Jackpot wins. Wins are doubled on bet lines with Wild symbols.

Scatters and Free Spins

The oil lamp is a Scatter symbol. Wins with Scatter symbols pay the multiplier (displayed in the paytable) multiplied by the total bet (for example, 5 Scatter symbols pay 500 multiplied the total bet). 3 to 5 Scatters award 15 Free Spins. During bonus spins, all wins are tripled, except for Jackpot wins.

Jackpot

Jackpot

The Jackpot is won if the reels come to a stop with 5 gem dealer symbols displayed on any bet line. The Jackpot is a progressive jackpot, where every time the game is played by any player a portion of the bet is added to the Jackpot.

PAYOUT RULES IN MAIN GAME

- The game is played with 10 bet lines (fixed), 1-10 bet levels and different coin values.
- Wins pay if in succession from leftmost to right, except Scatter symbols.
- All wins pay on bet lines only, except for wins with Scatter symbols.
- Only the highest win per bet line is paid.
- Bet line wins pay if in succession from the leftmost reel to the rightmost reel.
- Simultaneous wins on different bet lines are added.
- Wild symbol substitutes for all symbols except Scatter symbols.
- 5 Wild symbols appearing on a winning betline in the main game or Free Spins award jackpot.
- Wins with Wild symbols are doubled, excluding wins with only Wild symbols.
- A bet line win in coins is equal to the value shown in the Paytable multiplied by the bet level. This amount is also multiplied by any applicable multipliers.
- A bet line win in currency is equal to the win in coins multiplied by the coin value.

PAYOUT RULES IN FREE SPINS

- 3 or more Scatter symbols appearing anywhere on the reels activate 15 Free Spins.
- Free Spins are played at the same bet level and coin value as the round that activated Free Spins.
- 3 or more Scatter symbols appearing anywhere on the reels in Free Spins activates 15 additional Free Spins.
- Scatter and Free Spins wins are added to any bet line wins.
- During Free Spins, all wins, except for Jackpot wins, are tripled.
- Additional Free Spins won are not multiplied by the Free Spins multiplier.
- At the end of Free Spins, the total win from Free Spins is added to any wins from the round that activated Free Spins.

PAYOUT RULES IN JACKPOT

- The Jackpot is a progressive jackpot, where every time the game is played by a player a portion of the bet is added to the Jackpot.
- In case of a bet line win along with a jackpot win, only the jackpot win is paid.
- Progressive Jackpot wins are subject to verification by the Casino Operator and the Software Supplier. All decisions are final and no correspondence will be entered into.
- The amount of contributions vary according to the different type of Jackpots. Depending on the type of jackpots, the different contributions are as follows:
 - 4.5% of each bet is contributed to the global Jackpot. The seed value for the jackpot is 30000 Euros. 10% of the contributions are set aside for the next Jackpot.
 - 5% of each bet is contributed to the local Jackpot. The seed value for the jackpot is 5000 Euros. 10% of the contributions are set aside for the next Jackpot.
- Jackpot values displayed in the game are delayed by up to 30 seconds. On exceptionally rare occasions, it may happen that two Jackpots are won within those 30 seconds, in which case the win of the second Jackpot is the new re-seeded Jackpot which (on very rare occasions) is smaller than the previous Jackpot won. All players playing the game when a Jackpot is won will receive a notification within 30 seconds about the Jackpot amount being won.
- When one game round makes a claim for a certain jackpot, it is locked for that game round and simultaneously assured that no other game round can claim the same jackpot. Therefore, it is technically not possible to have two simultaneous wins of the same jackpot.
- If the communication between the Casino and Jackpot server fails, the game becomes unavailable. There will be no contributions or claims towards the Jackpot. The Jackpot amount remains the same until the communication is resumed.
- The Progressive Jackpot amount paid out is the Progressive Jackpot value on the casino server when a jackpot is won. Every effort is made to ensure that the Progressive Jackpot value displayed in the game is the same as the one on the casino server.
- The Jackpot is denominated in Euro and the Jackpot counter might be displayed in a currency other than that you are playing in. If you win a Jackpot and are playing casino games with a different currency, the amount won is converted to the currency in which you are playing and is added to your account.
- The currency conversion is based on currency exchange rates provided by SIX - the financial information provider.
- The Casino Operator and the Software Supplier reserve the right to change or waive the Jackpot rules at any time and for any period.
- The Jackpot cannot be won when playing for fun.

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

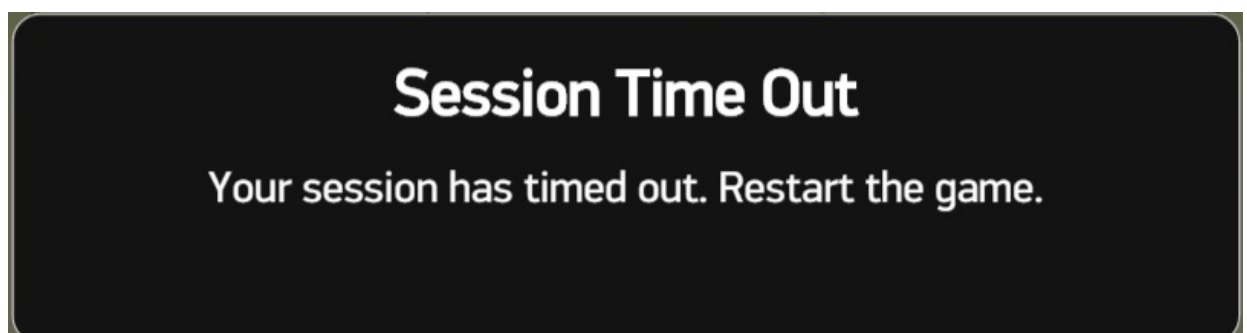

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
