Game Theme and Graphics

Join the everlasting battle between the Good and the Evil in NetEnt's™ latest offering - Archangels: Salvation™. The great forces have waged war against each other for thousands of years, and have reached a peak in this video slot.

The clash unfolds in the main game and intensifies in Free Spins.

Press Spin and be the one to witness the outcome of the wars to come.

Main Game

Players can select the coin value and bet level before spinning the reels.

Game actions

The buttons on the key pad perform the following different game actions:

	<p>Clicking the left and right buttons decreases and increases the bet level (i.e. number of coins per bet line) by 1. To increase or decrease faster, the player can click and drag the slider below.</p>
	<p>Clicking the Spin button starts a game round at the current bet level and coin value.</p>
	<p>MAX BET plays the game at the highest bet level and the current coin value.</p>
	<p>Clicking the left and right buttons decreases and increases the coin value to the next level.</p>
	<p>Clicking AUTOPLAY automatically plays the game for the selected number of rounds.</p>

Hot Spot Areas

Hot Spot Areas

- There are 2 separate hot spot areas in the game.
- The first consists of the top 2 rows of the game area, and the second consists of the bottom 2 rows of the game area.
- In Free Spins, both hot spot areas are increased to 3 rows.
- Each of the areas has its own Wild Feature. The top hot spot area activates the Heaven Feature, the bottom hot spot area - the Hell Feature.
- If the 2x2 Wild lands on the reels so that any of its part is in the hot spot area, the respective Wild Feature is activated.
- The Wild Feature is activated for each position on the reels that is occupied by the 2x2 Wild. For example, if the 2x2 Wild lands completely in the hot spot area, the feature is activated 4 times.
- The feature can be reactivated again if either a stack of Wild symbols (or its part) or a singleton Wild symbol lands in the hot spot area again.
- Either 1 stack of Wild symbols or 4 singleton Wild symbols are generated for each Wild symbol in the hot spot area.
- The same feature cannot be activated 2 times in a row. Only 1 feature can be active at a time. For example, if the Hell Feature was activated at first, then the next to be reactivated will be the Heaven Feature.
- There can only be 2 types of Wild symbols present on the reels during the features: singleton Wild symbols and stacks of Wild symbols.
- The features end when either no new Wild symbols land in the hot spot areas or when the Wild symbol has no free position to land on the reels.
- The win from the Wild Features is evaluated and paid out after the features have been played.
- Wild Feature wins are added to any bet line wins.

Heaven Feature

Heaven Feature

- The Heaven Feature is activated, when a 2x2 Wild symbol lands fully or partially in the top hot spot area.
- If the 2x2 Wild lands partially in the hot spot area, 2 stacks of Wild symbols are generated. If the 2x2 Wild symbol lands fully, 4 stacks of Wild symbols are generated.
- The length of the stacks of Wild symbols varies from 3 to 5 symbols.
- The stacks of Wild symbols can fully cover Scatter symbols, singleton Wild symbols and fully/partially smaller stacks of Wild symbols.
- The stacks of Wild symbols cannot land in the top hot spot area.

Hell Feature

Hell Feature

- The Hell Feature is activated, when a 2x2 Wild symbol lands fully or partially in the bottom hot spot area.
- Should this happen, the hell area starts shooting singleton Wild symbols that land randomly on the reels.
- Singleton Wild symbols cannot land on top of Scatter and other Wild symbols, and in the bottom hot spot area.
- The number of Wild symbols shot is either 8 or 16, depending on whether the Wild symbol landed partially or fully in the hot spot area.

Free Spins

Free Spins

Free Spins

- 3 or more stacked Scatter symbols appearing anywhere on the reels activate Free Spins.
- The Scatter symbols are 2-stacked, meaning they occupy 2 positions on the reels.
- Each stack of Scatters counts as one symbol, even though it occupies 2 positions on the reels.
- If only a part of the stack is visible, it will still count as a whole Scatter symbol.
- If the Scatter symbol is covered with a stack of Wild symbols, the Scatter symbol will still activate Free Spins.
- If Free Spins and Wild Features are activated at the same time, Wild Features are played first.
- 3, 4, 5, and 6 Scatters symbols award 10, 15, 20, and 25 Free Spins respectively.

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

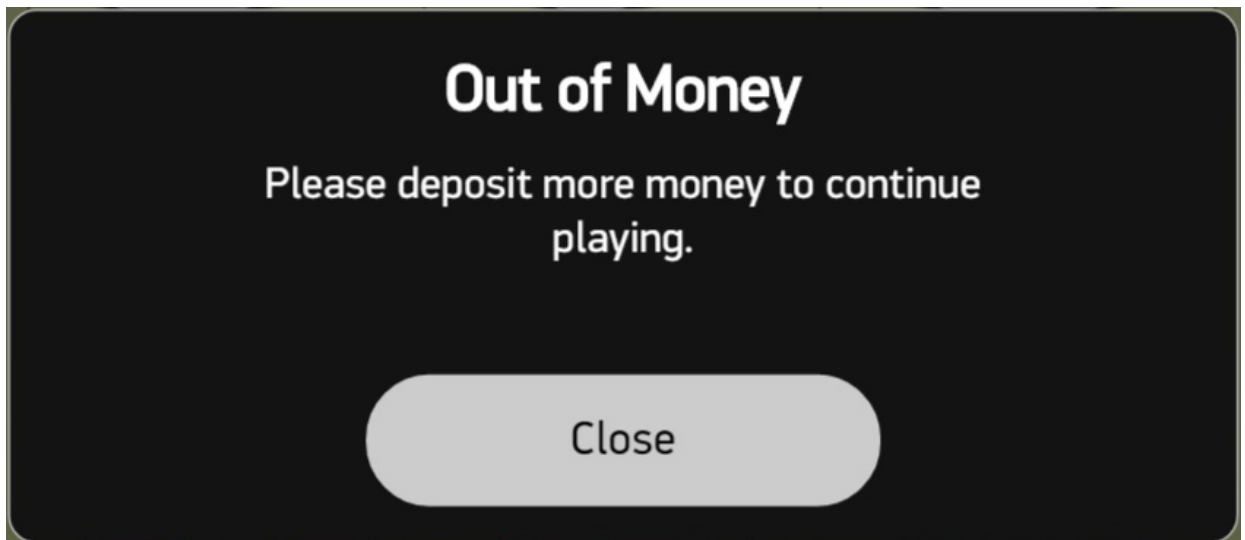

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
