Wild symbol

Wild Substitution

Wild symbols can appear anywhere on the reels in the main game and Re-Spins and substitute for all symbols except for Scatter symbols.

Wild symbol substitution pays the highest possible winning combination on a bet line according to the Paytable.

Re-Spins activation

Re-Spins

Re-Spins

Whenever a stack of Butterfly symbols lands covering the entire reel, the Re-Spins are activated.

All Butterfly symbols fly to the leftmost position on the same row not already occupied by a Butterfly symbol and remain on the reels until the end of the Re-Spins.

Before the Re-Spins start, any bet line wins from the round that activated the Re-Spins are paid.

All Butterfly symbols landing visible on the reels during the Re-Spin fly to the leftmost position on the same row not already occupied by a Butterfly symbol, award another Re-Spin and remain on the reels until the end of the Re-Spins.

Butterfly symbols landing behind the Butterfly symbols are not considered visible.

When no more Butterfly symbols land visible on the reels during the Re-Spin, Re-Spins end and any bet line wins are paid out.

Any Re-Spins wins are added to any wins from the initial spin.

Butterfly Spins and Re-Spins cannot be activated simultaneously.

Scatter symbol

Butterfly Spins

3 or more Scatter symbols appearing anywhere on the reels in the main game activate Butterfly Spins.

During Butterfly Spins, only Cocoon symbols can land on the reels.

Cocoon symbols can be dormant or active. Active Cocoon symbols landing visible on the reels turn into Butterfly symbols.

All Butterfly symbols fly to the leftmost position on the same row not already occupied by a Butterfly symbol, all bet line wins are added to the total win, and the Butterfly symbols remain on the reels until the end of the Butterfly Spins.

Additional Butterfly Spins cannot be won during Butterfly Spins.

Butterfly Spins are played at the same bet level and coin value as the round that activated Butterfly Spins.

At the end of Butterfly Spins, any wins from Butterfly Spins are added to any wins from the round that activated Butterfly Spins.

At the end of Butterfly Spins, the game returns to the round that activated Butterfly Spins.

Randomisation

RANDOM NUMBER GENERATOR (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

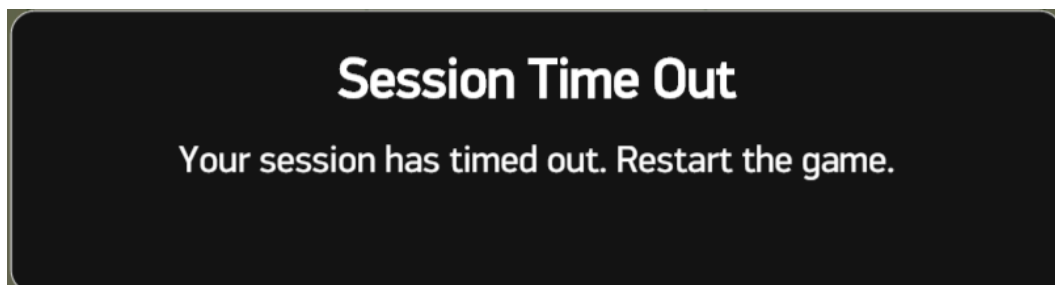

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
