Game Theme and Graphics

Copy Cats™ is a colorful game with crazy city cats having fun during the day and being chased down the dark alleys by spotlights at night.

Copy Cats™ has a cool jazz-inspired soundtrack that adds to the fun and excitement of the Copy Cats feature.

Main Game

Players can select the coin value and bet level before starting the game round.

- **Game actions.** The buttons on the key pad perform the following different game actions:

	Clicking the left and right arrows increases and decreases the bet level (i.e. number of coins per bet line) by 1. To increase or decrease faster, the player can click and drag the slider below.
	Clicking the Spin button starts a game round at the current bet level and coin value.
	MAX BET plays the game at the highest bet level and the current coin value.
	Clicking the left and right arrows increases and decreases the coin value to the next level. To increase or decrease faster, the player can click and drag the slider below.
	Clicking AUTO automatically plays the game for the selected number of rounds.

Copy Cats feature

Copy Cats Feature

There are four different types of cat symbols: a red cat, a pink cat, a blue cat and a golden cat. The golden cat symbolizes the Wild symbol.

A full stack of any of the cat symbols or a Stacked Wild covering all positions on reel 1 in the main game, activates the Copy Cats feature.

In the Copy Cats feature, all cat symbols appearing on reels 2, 3, 4, and 5 only, turn into the same cat symbol as the one that activated the feature.

All cat symbols return to their original state at the beginning of the next spin.

Free Spins

Free Spins

3 Bonus symbols appearing anywhere on reels 1, 3 and 5, in the main game, activate 10 Free Spins.

Free Spins are played at the same bet level and coin value as the round that activated Free Spins.

Additional Free Spins can be won during Free Spins.

In Free Spins all cat symbols on Reel 1 are Wild, meaning that here the Copy Cats feature turns all other cat symbols into Wilds with a chance of bigger wins!

Randomisation

RANDOM NUMBER GENERATOR (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
