GAME DESIGN

Rows and reels, bet lines

Main game

Game Theme & Graphics

The game display comprises three main elements - video display area, keypad area, and game panel.

- **Video display area.** The main game reels, the free spin reels, and the off the reels bonus game are displayed in this upper area. In addition, the PAYTABLE button and information about the maximum possible coin win are shown.
- **Keypad area.** The keypad area shows the current bet level (that is, the number of coins wagered per bet line), the current number of bet lines, the available cash in coins, and the current coin value. This area also contains the main game buttons used to select the bet level, bet lines, coin value, and to start the game.
- **Game panel.** The game panel at the bottom houses the buttons for the game settings, audio, and autoplay menus, and the game rules. This area also displays the player's account information and alternates between showing the available cash, current bet, amount won, and player mode (when in Play for Fun mode).

Main Game

Players can select the coin value, number of bet lines and bet level before spinning the reels.

- **Game rounds.** When the player clicks the spin button, the amount bet is debited from the current credit (available coins and credit). The reels automatically come to rest. Alternatively, when G4 mode is disabled, the player can stop the reels by clicking the spin button.
- **Game results.** Players can win on any of the bet lines on which they bet. The game highlights which lines are winners and how much has been won on each line. The total winnings are added together and shown in the Win box. The amount won is added to the cash and displays in the game panel.
- **Reel Spin Acceleration.** Anticipation of winning is enhanced with a reel spin acceleration that starts when 2 scatters appear on the reels, or when the bonus symbol has appeared on reels 1 and 2.

Game Actions.

The buttons on the key pad perform the different game actions:

	Clicking this button increases the bet level (that is, number of coins per bet line) by 1.
	Clicking this button increases the number of bet lines by 1.
	Clicking the Spin button starts a game round at the current bet level.
	Clicking this button changes the bet level to 4, and starts a game round with all bet lines selected.

	Clicking this button increases the coin value to the next level.

Wild Substitution

Diamond Dogs has an animated wild symbol when displayed on a winning bet line.

- **Substitution.** Wild symbols substitute for any other symbol - except scatter and bonus symbols - to complete winning bet lines.
- **Wins as a regular symbol.** The wild acts as a regular symbol. Here is the highest win in the main game (excluding Free spins).

Wild symbol

Celebrity Photo Shoot Bonus Game

The Celebrity Photo Shoot bonus game gives the player the chance to win more coins.

- **Bonus game trigger.** 3 or more bonus symbols on an active bet line, if in succession from leftmost to right, start the bonus game.

Note: Only 1 bonus game awarded per spin.

- **Bonus game play.** The player takes on the role of a photographer, standing by the red carpet to a VIP party. Some of the biggest names in the doggy world appear, and the player must click on a VIP to take a photo. For every good photo taken, bonus money is won and added to the Total bonus counter.
- **Bonus game finish.** If a fuzzy photo is taken, the bonus game ends and the total bonus amount in coins is added to the player's game win. The player must click the return to game arrow to continue playing the main game.
- **Feature preview.** Players can preview the bonus game by clicking FEATURE PREVIEW to the right of the game buttons on the keypad of the main game.

Bonus game entry

Scatters and Free Spins

Diamond Dogs features animated scatter symbols.

- **Scatter wins.** The main game pays out on 2 or more scatters. These wins pay the multiplier displayed in the paytable multiplied by the total bet.

Player excitement and win anticipation is enhanced by reel acceleration when 2 scatters appear and there is still one or more reels to spin.

- **Free spins feature.** When 3 or more scatter symbols appear in any position, the player wins 10 Free spins. The Free spins are played at the same bet level and with the same number of bet lines as the game that triggered the Free spins. A dynamic sign informs players how many Free spins are remaining.
- **Free spin mode.** Players click the Start Free Spins button to enter free spin mode. Free spins are played with the same bet

Scatters and Free Spins 1

level and number of lines as the game that triggered the free spins. A dynamic sign informs players how many free spins remain, and the current multiplier applied to free spin wins. This is updated each time the free spins feature is re-triggered and new free spins or multiplier are won.

- **Re-triggered free spins.** During Free spins, 3 or more scatter symbols gives additional Free spins.
- **Free spin wins:** Bet line wins during Free spins are tripled (x3). At the end of the Free spins the winnings are added to the player's cash.

Paytable

Paytable

Main slot winnings are paid out depending on the symbols displayed on a bet line when the reels come to a stop. For a combination of regular symbols to be a winning combination, at least 1 of the symbols must be displayed on the first slot reel, and the remaining symbols must be next to each other on the enabled bet line. The in-slot paytable displays the payout for each winning combination and bonus feature.

Players click PAYTABLE to display the paytable page which shows the payout and rules for all of the symbols.

To return to the game, players click the return to game arrow.

ADDITIONAL INFORMATION
Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.
Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

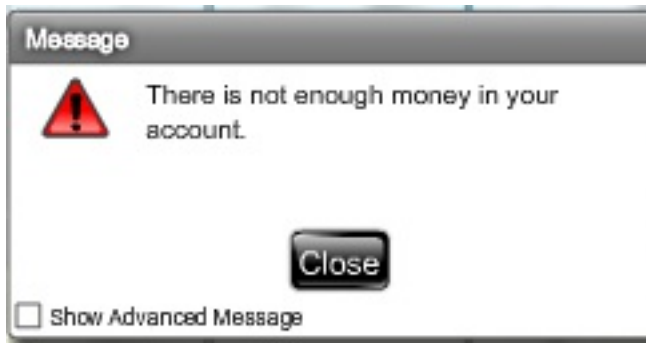

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

Game Simulation
