Main Game

Game Theme & Graphics

The main game features a darkly brooding Dracula at the side of the reels. As well as the fantastic features associated with NetEnt™ games, Dracula has spine-chilling sounds and dramatic animations adding to the excitement of the game.

The main feature of the game is the Bat feature; when this hair-raising feature is activated, bats take flight over the reels. When the bat cluster lands, it transforms the symbols it lands on into the same randomly activated symbol.

Main Game

Players can select the coin value and bet level before starting the game round.

Game Actions

The buttons on the key pad perform the following different game actions:

	Clicking the left and right arrows increases and decreases the bet level (i.e. number of coins per bet line) by 1. To increase or decrease faster, the player can click and drag the slider below.
	Clicking the Spin button starts a game round at the current bet level and coin value.
	MAX BET plays the game at the highest bet level and the current coin value.
	Clicking the left and right arrows increases and decreases the coin value to the next level.
	Clicking AUTOPLAY automatically plays the game for the selected number of rounds.
20 symbols activated in Bat feature

Bat Feature

In the main game, the Bat feature is randomly activated and may be activated once per spin only.

In the main game, Free Spins cannot be won if the Bat feature is activated.

When the Bat feature has been activated, bats will fly in and land anywhere on the spinning reels in a cluster formation.

All bats in the cluster turn into the same random symbol, including the Wild symbol.

Wild symbol

Wild Substitution and Stacked Wild

Wild symbols substitute for the highest possible winning combination on a bet line.

Stacked Wild symbols can appear randomly anywhere on reel 3 in Free Spins only and substitute for the highest possible winning combination on a bet line.

Stacked Wild symbol

Free Spins

Free Spins

10 Free Spins are activated when both the stacked Dracula symbol appears on reel 2 and the stacked Lady symbol appears on reel 4 in the main game.

In Free Spins, the bats swoop dramatically onto the reels on every single spin, adding to anticipation for players as they wait to see how many bats will fly onto the reels and transform symbols.

If 20 Bats swoop onto the reels, all the reels are covered with bats!

In Free Spins, the Bat feature is activated once per spin only.

2 Additional Free Spins can be won when the Stacked Wild symbol appears on reel 3 during Free Spins.

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.
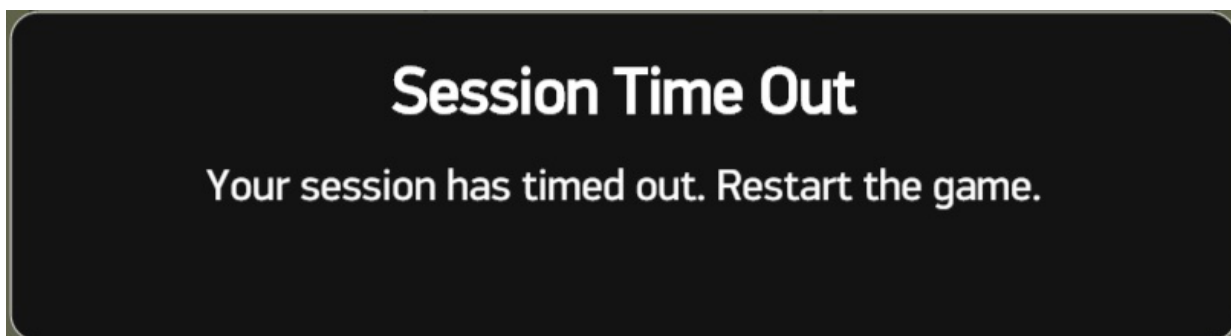

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.
If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.
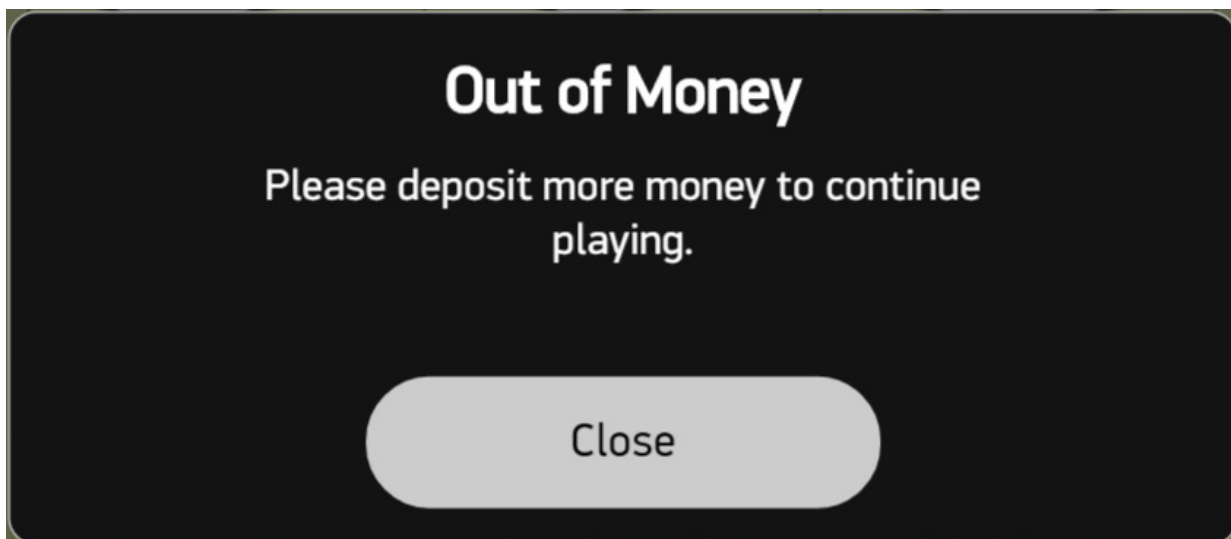

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
