

DRAGON ISLAND™

Game Type: Video Slot Game
Return to Player: 96.7%

In Net Entertainment's latest 5-reel, 3-row video slot, the Win Both Ways feature debuts. This feature gives the player the possibility to win either when symbols display in succession from the left to the right or the right to the left. Players have even more opportunities for wins as Free Spins features an Expanded Wild that appears on a randomly selected reel before each spin. A third innovation is a Golden Wild symbol with a multiplier up to an impressive x8.

With so many ways to win, players will not be able to resist taking a spin on Dragon Island.

Reel spin animation

Game Theme & Graphics

The setting for this latest video slot from Net Entertainment is a secluded and uninhabited island; uninhabited by humans at least. Five mystical dragons lay claim to this particular island and they have one common goal in mind: to protect the prized golden dragon statue.

In their quest for the golden statue, the player will encounter vivid and richly coloured graphics in addition to subtle animations which mark key events in the game and enhance the game play experience.

- **Scatter.** Hits on the Scatter symbol are emphasized with a violent volcanic eruption.
- **Waterfall.** A calming waterfall constantly flows behind the game keypad.
- **Expanded Wild.** The exterior of the stone dragon breaks away for every win on the Expanded Wild in Free Spins.

Intro screen

Main Game

Dragon Island™ is a 5-reel, 15-bet line video slot.

- **Reel Spin Suspense.** In this game Net Entertainment continues to use a near win reel spin to provide additional excitement, heightened suspense and win anticipation.
- **Big Win.** All high wins in the game are followed by a special Big Win presentation.
- **Quick Spin.** Game rounds can be sped up by checking the Quick Spin option in the game settings menu. G4 restrictions apply.

Expanded Wild in Free Spins

Wild Substitution

3 different variations of Wild substitution breathe some additional fire into Dragon Island™.

- **Regular Wild Substitution.** The Wild symbol substitutes for any symbol except the Scatter and Golden Wild symbols.
- **Expanded Wild Substitution.** During Free Spins an Expanded Wild appears over a randomly selected reel before each spin.
- **Golden Wild Substitution.** Golden Wild symbol appears on the middle reel when Win Both Ways is activated and substitutes for all symbols except Scatter. The Golden Wild is distinguished from the regular Wild by a random multiplier which increases the wins on completed bet lines up to x8.

Bet line win from the far right reel

Win Both Ways

Dragon Island™ is Net Entertainment's first video slot to feature Win Both Ways - a bet line innovation which allows players to win on matching symbols in succession from both left to right and right to left.

- Clicking WIN BOTH WAYS in the key pad activates and deactivates the feature. A pop-up window over the slot area also shows the player whether the feature is on or off.
- By activating Win Both Ways, the player automatically doubles their current bet.
- When 5 matching symbols appear on one bet line and Win Both Ways is activated, the payout is x2.
- Simultaneous wins on the same bet line are added together when Win Both Ways is activated.

Free Spins trigger

Scatters and Free Spins

Dragon Island™ also features animated Scatter symbols that reward the player with Free Spins when appearing on the reels.

- **Free Spins Trigger** Free Spins are activated when 3 or more Scatter symbols appear on the reels.
- **Free Spins Feature.** Excitement and win possibilities in Free Spins are heightened as an Expanded Wild covers a randomly determined reel before each spin.
- **Free spins Re-trigger.** During Free Spins, 3 or more Scatter symbols activate additional Free Spins.

Video Slot Elements

Video Slot Elements

Dragon Island™ uses the standard Net Entertainment video slot display area, keypad, and game panel. Players use the following game elements to perform the following actions.

<p>BET LEVEL</p>	<p>Clicking the left and right arrows (that is, number of coins per bet line) by 1. To increase or decrease faster, the player can click and drag the slider below.</p>
<p>BET LINES</p>	<p>Clicking on the left and right arrows increases and decreases the number of bet lines by 1. To increase or decrease faster, the player can click and drag the slider below. (Alternatively, clicking a bet line number in the video display area selects the corresponding number of bet lines.)</p>
	<p>Clicking the Spin button starts a game round at the current bet level and coin value.</p>
<p>MAX BET</p>	<p>Clicking this button changes the bet to the highest bet level and maximum bet lines before starting a game round.</p>

COIN VALUE	Clicking the left and right arrows increases and decreases the coin value to the next level. To increase or decrease faster, the player can click and drag the slider below.
WIN BOTH WAYS	Activates and deactivates the Win Both Ways feature.
AUTOPLAY	Players can open the Autoplay options window by clicking this button.

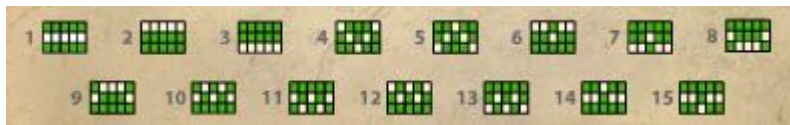

Page 2 of the Paytable

Paytable

Dragon Island™ has a three page in-slot paytable which displays the payout for each winning combination and other game features. Left and right arrows move the player between the paytable pages.

- **Page 1.** Displays information about Free Spins and the different Wild substitutions.
- **Page 2.** Displays payout information on the medium value symbols.
- **Page 3.** Display payout information on the low value symbols.

HIT FREQUENCY

Win Both Ways disabled

- Any Win Base 35.6%
- Any Win Free Spins 55.9%
- Base Bet Lines 30.1%
- Base Scatters 7.0%
- Into Free Spins 0.65%

Win Both Ways enabled

- Any Win Base 39.7%
- Any Win Free Spins 76.5%
- Base Bet Lines 34.4%
- Base Scatters 7.2%
- Into Free Spins 0.68%

MAXIMUM PAYOUT

- Main game: €2 00 000 / 4 00 000 coins - on a single bet line
- Free spins: €2 00 000 / 4 00 000 coins - on a single bet line
- Coinciding: €3 35 800 / 6 71 600 coins

Note: The maximum win of a game round is higher than the maximum coinciding win, since a game round may include several spins.

PAYOUT RULES IN MAIN GAME

- Bet line wins are multiplied by the number of coins bet per bet line.
- Bet line wins pay if in succession from leftmost to right.
- When Win Both Ways is activated, bet line wins pay when in succession from either, the far left to right or the far right to left.
- 5 matching symbols on a bet line with Win Both Ways activated pays x2.
- Scatter wins are paid independent of bet lines selected.
- 3+ Scatter symbols activate Free Spins.
- Simultaneous wins on a bet line are added.
- Wins on Golden Wild are multiplied x2 - x8 when completing winning bet lines.

PAYOUT RULES IN FREE SPINS

- In Free Spins, 3+ Scatter symbols activate additional Free Spins.

Paytable

WILD
Substitutes for all symbols except Scatter and Golden Wild symbols.

GOLDEN WILD
When Win Both Ways is activated, Golden Wild symbols can appear for a chance at bigger wins. Golden Wild substitutes for all symbols except Scatter symbols. Wins on Golden Wild are multiplied x2 - x8 when completing winning bet lines.

SCATTER
Scatter wins pay total bet x multiplier:
3+ scatter symbols activate Free spins.
Free Spins features an Expanded Wild, which appears on a random reel before each spin.
In Free spins, 3+ scatter symbols activate additional Free spins.

5	100	+50 FREE SPINS
4	10	+20 FREE SPINS

Randomisation

RANDOM NUMBER GENERATOR (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an independent 3rd party verification body, Technical Systems Testing in Canada.

ALGORITHM FOR A RANDOM REEL POSITION

A reel represents an array of symbols where each symbol has an index ("a position").

1. A random number between 0 (zero) and the length of the reel is acquired.
2. The random number is added to the game as "the new reel position to use".

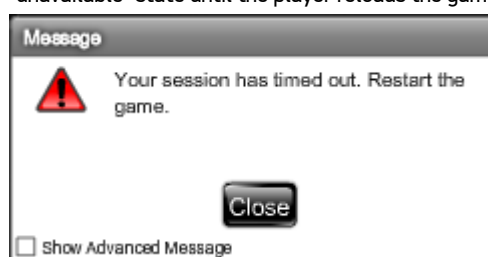

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

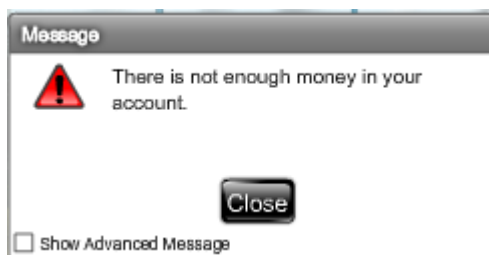

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that “In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded.”

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
