GAME DESIGN
EggOMatic™ graphics

Game Theme & Graphics

The setting for EggOMatic™ is a futuristic yet retro automated chicken coop, with clucking robotic chickens, where the eggs are mechanically produced by the shiny metallic EggOMatic™ machine.

EggOMatic™ conveyor belt

EggOMatic™ Conveyor Belt

The EggOMatic™ machine manufactures 4 different prize eggs and puts them onto a conveyor belt. The prize eggs trigger either coin wins, Spreading Wilds, Free Spins, or even a Surprise Egg, which contains any one of the prizes.
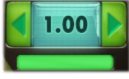

When an egg is won, it drops from the conveyor belt onto the rooster, who catches the egg and breaks it open to award the prize. When EggOMatic™ deliver the goods, win presentations accompanied by shower of golden coins, ambient sounds, and colourful animations, all add to the fun of this hen house, where players will love the chances to feather their nests.

Main game

Main Game

Players can select the coin value and bet level before starting the game round.

Game actions

The buttons on the key pad perform the following different game actions.

10	Clicking the left and right arrows increases and decreases the bet level (i.e. number of coins per bet line) by 1. To increase or decrease faster, the player can click and drag the slider below.
(Spin button)	Clicking the Spin button starts a game round at the current bet level and coin value.
MAX BET	MAX BET plays the game at the highest bet level and the current coin value.
1.00	Clicking the left and right arrows increases and decreases the coin value to the next level.
AUTO PLAY	Clicking AUTOPLAY automatically plays the game for the selected number of rounds.

Wild symbol

Wild Substitution & Spreading Wild

Wild symbols and Spreading Wilds can substitute for all symbols in the main game and in Free Spins, and can appear on any reel, paying the highest winning combination on the bet lines.

The EggOMatic™ Wild and the Spreading Wild provide players with massive winning opportunities, turning all adjacent and diagonal symbols into additional Wild symbols.

Spreading Wild

Free Spins

Free Spins

Free Spins gets off to a cracking start, when the EggOMatic™ places 5 randomly selected prize eggs on the conveyor belt.

EggOMatic™ in Free Spins mode continues to offer players maximum opportunities for wins: with the chance to win any of the features contained in the eggs, a new egg on the reels for every spin, up to a massive 50 Free Spins, and additional Free Spins.

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.
Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.
If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.
(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
