Game Theme & Graphics

Excalibur is a game with a thrilling soundtrack that takes the players back to the medieval times of King Arthur and his magical sword, Excalibur.

Symbols like the Lady of the Lake, the Excalibur, the wizard Merlin, King Arthur and his evil half-sister add up to the thrill and beautifully illustrate the theme of this legendary tale.

Main Game

Players can select the coin value and bet level before spinning the reels.

Game Actions.

The buttons on the keypad perform the different game actions:

	<p>Clicking the left and right arrows increases and decreases the bet level (i.e. number of coins per bet line) by 1. To increase or decrease faster, the player can click and drag the slider below.</p>
	<p>Clicking the Spin button starts a game round at the current bet level and coin value.</p>
	<p>MAX BET plays the game at the highest bet level and the current coin value.</p>
	<p>Clicking the left and right arrows increases and decreases the coin value to the next level. To increase or decrease faster, the player can click and drag the slider below.</p>
	<p>Clicking AUTOPLAY automatically plays the game for the selected number of rounds.</p>

Wild Substitution

The Excalibur acts as a regular Wild symbol to substitute for other symbols to complete winning combinations. Substitution wins with regular Wild symbols pay the win x2.

The Wild symbol substitutes for all symbols except Scatter symbols and Golden Wild.

Win with Golden Wild substitution

Golden Wild Substitution

The Golden Excalibur, which only appears on the 3rd reel, acts as a regular Wild symbol to substitute for other symbols to complete winning combinations.

Golden Wild substitutes for all symbols except Scatter symbols, and pays win amount x4 for all symbols except regular Wild symbols. Only one Golden Wild multiplier is applied to bet line wins with both Wild and Golden Wild symbols appearing on a winning line.

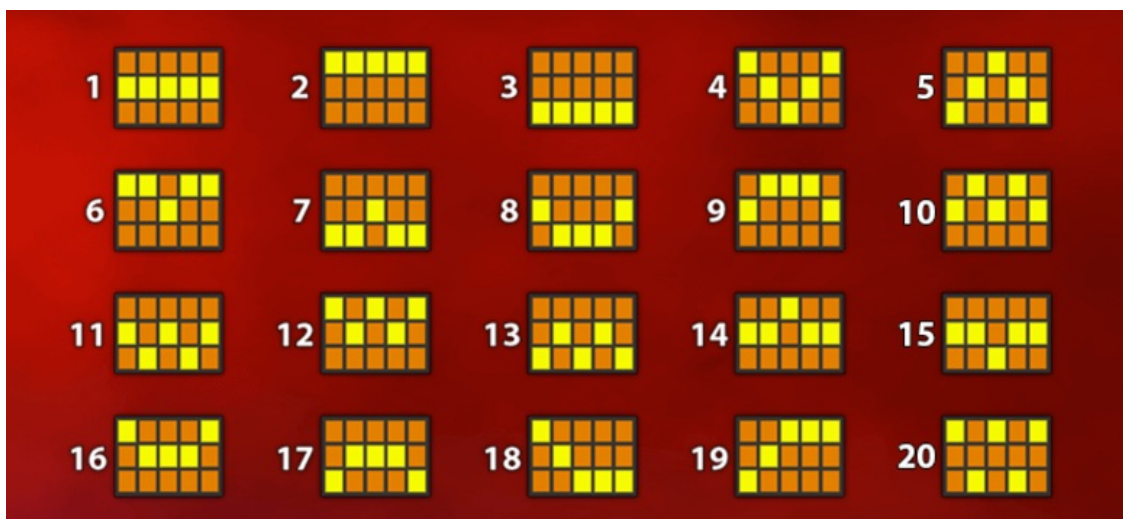

Win with 2 scatters

Scatters and Free Spins

Scatter symbol, the gold grail, pays total bet times multiplier. 3 or more Scatter symbols appearing anywhere on the reels in the main game activate Free Spins.

During Free Spins, betline wins from Wild and Golden Wild symbols are multiplied by the Wild multiplier as well as the Free Spins multiplier.

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
