Whenever Stacked Wild symbols land covering the entire reel, a Stacked Wild Re-Spin is awarded.

More Stacked Wild Re-Spins are awarded, if further stacks land visible covering the entire reel.

The Stacked Wild symbols covering the entire reel from the spin that activated the Stacked Wild Re-Spin remain in the same position on the reels during the Stacked Wild Re-Spin.

Stacked Wild symbols landing behind the Stacked Wild symbols are not considered visible.

When there are no more visible Stacked Wild symbols that cover the entire reel, Stacked Wild Re-Spins end.

## Fairy Surprise

The Fairy Surprise Random Feature is activated randomly in case of a no win situation in the main game.

A symbol is randomly selected from the symbols on the reels after the spin. Other symbols, starting from the low win symbols, will turn into the selected symbol until a win is awarded.

The Bonus and the Wild symbols cannot be selected during this feature.

## Fairy Wild Spin

3 Bonus symbols appearing on reels 1, 3 and 5 in the main game activate one of the Bonus Features.

To activate a Bonus Feature, the player picks one of three chests.

The 3 Bonus Features are: Candy House Bonus, Free Spins, and Coin Win.

## Candy House Bonus

When the Candy House Bonus is activated, the player picks 3 out of 15 items.

Each item equals a certain multiplier. The multiplier value is not revealed.

After having picked the 3 multipliers, the player can either choose to receive the average value of the 3 multipliers, or pick one of the 3 previously chosen multipliers.

The multiplier value is revealed after the player makes the choice.

The minimum and maximum multipliers range between x1.2 and x120 times the bet.

At the end of the Candy House Bonus, the bet is multiplied by the chosen multiplier which is then added to any wins from the round that activated the Candy House Bonus.

**Randomisation**

**RANDOM NUMBER GENERATOR (RNG)**

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

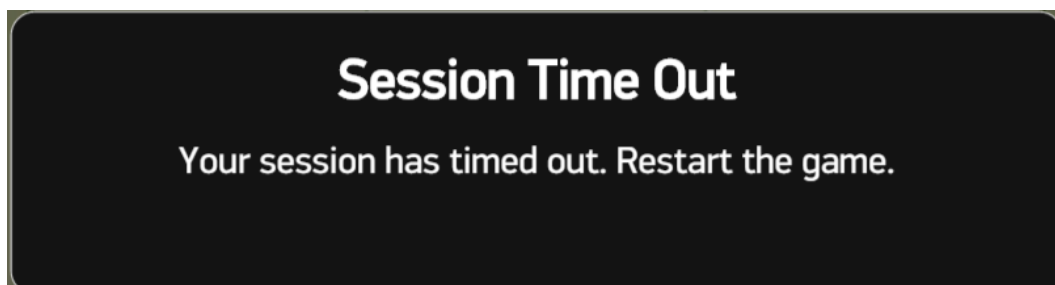

**Malfunction Management**

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

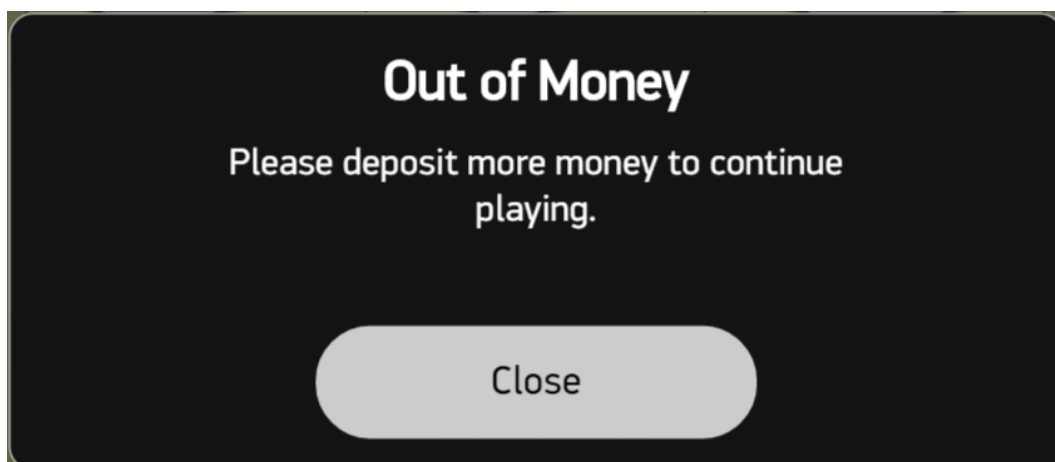

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

### Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
