GAME DESIGN

Lucky Wild Reels

Lucky Wild Reels

Lucky Wild Reels randomly appear during the main game as an overlay reel with only Wild symbols. Between 1 and 5 reels can turn into Lucky Wild Reels. Wild symbols substitute for all symbols except for Free Spin symbols.

Free Spins activation

Free Spins with Linked Reels

3 or more Free Spin symbols appearing anywhere on the reels in the main game activate Free Spins.

- 3 Free Spin symbols = 8 Free Spins
- 4 Free Spin symbols = 12 Free Spins
- 5 Free Spin symbols = 16 Free Spins

Free Spins awarded

Free Spins with Linked Reels

Free Spins with Linked Reels Behaviour

The Linked Reels feature appears during Free Spins only. At the beginning of each spin, identical linked reels appear adjacently on any of reels 1-4.

The right reel is a copy of the left reel, with reel 1 linked to reel 2 and/or reel 3 linked to reel 4.

PAYOUT

Payout Summary

GAME RETURN TO PLAYER (RTP)

- Total: 96.90%
- Main Game: 68.88%

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

Game Simulation

A demo version of the game is available at <http://www.netent.com/games/>
