GAME DESIGN

Go Bananas!™ graphics

Win celebration
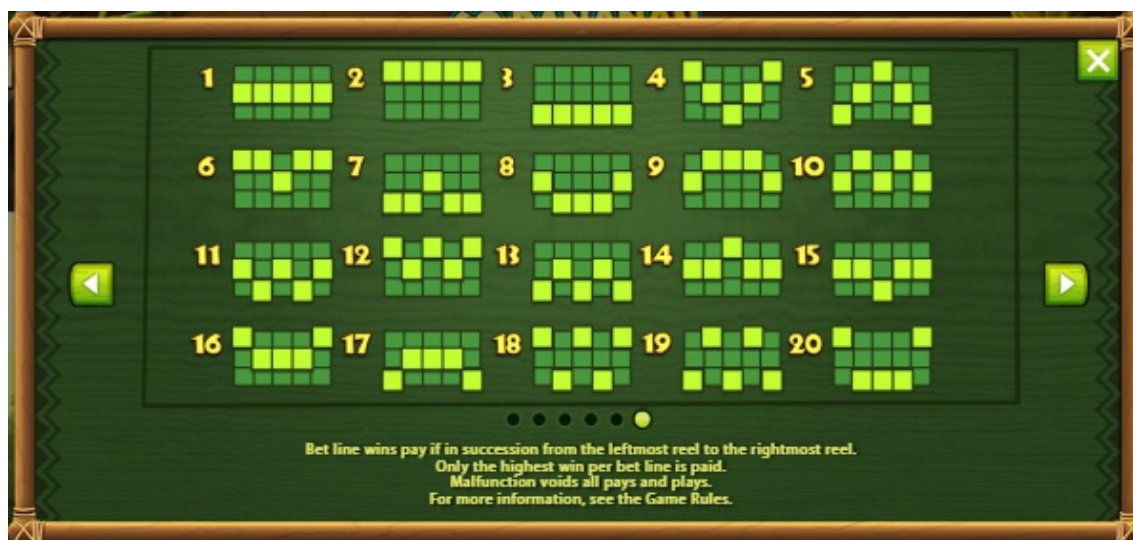

Game Theme & Graphics

Go Bananas!™ is a vivid and lively game packed with celebratory animations. Every time there is a monkey win, the whimsical apes come to life and salute the player. Each and every monkey has their own personality, which they show in different humorous ways in the tree house arena, high up in the hot tropical jungle. You will never know what to expect!

Wild Monkey Symbols

Wild Monkey Symbols

The game has 5 different Wild Monkey symbols: Wild Gorilla, Wild Orangutan, Wild Baboon, Wild Langur, and Wild Tarsier.

When any of the 5 different Wild Monkeys appear on the reels, they turn themselves and some of the adjacent symbols into Wild symbols according to individual pattern. If there is a winning pattern, the jovial monkeys come to life and celebrate the win!

ADDITIONAL INFORMATION

## Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.
Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.
In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

Game Simulation
