Main Game

Players can select the coin value and bet level before starting the game round.

- **Game actions.** The buttons on the keypad perform the following different game actions:

	Clicking the left and right arrows increases and decreases the bet level (i.e. number of coins per bet line) by 1. To increase or decrease faster, the player can click and drag the slider below.
	Clicking the Spin button starts a game round at the current bet level and coin value.
	MAX BET plays the game at the highest bet level and the current coin value.
	Clicking the left and right arrows increases and decreases the coin value to the next level. To increase or decrease faster, the player can click and drag the slider below.
	Clicking AUTOPLAY automatically plays the game for the selected number of rounds.

Wild symbol

Hot Spot Win

Joker Pro Re-Spins

In the main game, one or more Scatter symbols landing on reels 2, 3, or 4 activate the Joker Pro Re-Spins.

Scatter symbols can only appear in the main game on reels 2, 3 and 4.

If three Scatter symbols land in the middle of reels 2, 3, and 4 in the main game, the Hot Spot Win of 1000 times the total bet is awarded.

Joker Pro Re-Spins are played at the same bet level and coin value as the spin that activated the Joker Pro Re-Spins.

During Joker Pro Re-Spins, reels 1 and 5 turn into Wild reels and three Hot Spot positions appear in the middle of reels 2, 3, and 4.

The Scatter symbols that activated the Joker Pro Re-Spins turn into Wild symbols that stick on the reels, and the reels re-spin.

If three Wild symbols land in the Hot Spot positions, the Hot Spot Win of 1000 times bet is awarded and the Joker Pro Re-Spins end.

Wild symbols can only appear on reels 2, 3 and 4 in the Joker Pro Re-Spins and substitute for all symbols except Scatter symbols.

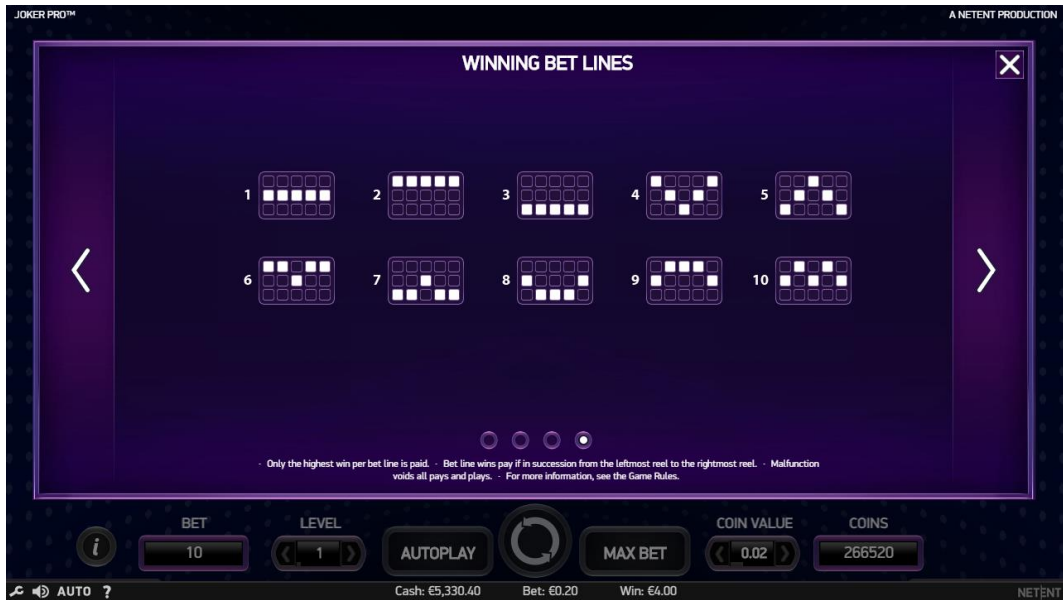

One or more additional Wild symbols landing on the reels during a Joker Pro Re-Spin award another Joker Pro Re-Spin and stick to the reels until the end of the Joker Pro Re-Spins.

The total win from the Joker Pro Re-Spins is added to any wins from the round that activated the Joker Pro Re-Spins.

If the total Joker Pro Re-Spins win, including any wins from the round that activated the Joker Pro Re-Spins, exceeds 1000 times the total bet, the win of exactly 1000 times the total bet is awarded and the Joker Pro Re-Spins end.

If no additional Wild symbols land on the reels during a Joker Pro Re-Spin, the Joker Pro Re-Spins end.

Randomisation

RANDOM NUMBER GENERATOR (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

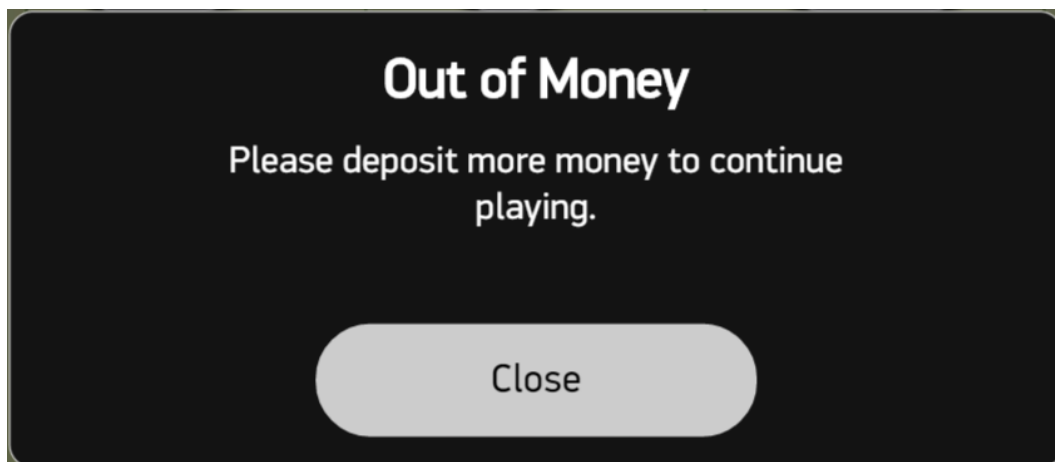

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
