Symbol Expansion Feature

Each symbol in the game, except for the Scatter symbol, may be marked by butterflies.

Whenever such a symbol takes part in a winning combination in both the main game or Free Spins, it expands to cover the entire reel.

Butterfly Boost feature

Butterfly Boost Feature

The Butterfly Boost feature is activated randomly in the main game during a win situation, when there are no Scatter symbols or symbols marked by butterflies on the reels.

The butterflies fly around the reels and will expand 1 to 3 symbols that take part in a guaranteed winning combination. The expanded symbol will cover the entire reel.

Free Spins Intro

Free Spins

3 to 5 Scatter symbols appearing anywhere on the reels in the main game activate Free Spins.

In Free Spins, the game turns into a 5-reel, 4-row video slot, thus increasing the bet ways up to 1024.

If Free Spins are activated with either 4 or 5 Scatter symbols, the player receives a coin win that equals 15 or 50 times the bet respectively.

On entering the Free Spins, the player chooses 1 out of 5 Free Spins animals.

The animal chosen will be the dominant medium symbol. The dominant medium symbol will be the only medium symbol on the reels during Free Spins.

Each animal awards a corresponding number of Free Spins.

Additional Free Spins cannot be won during Free Spins.

Randomisation

RANDOM NUMBER GENERATOR (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

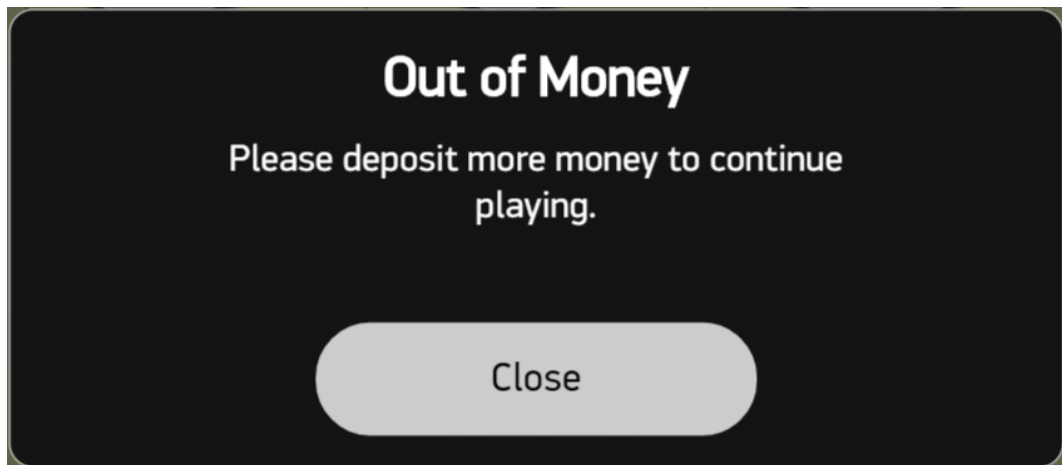

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
