## Game Theme and Graphics

Mega Fortune Dreams™ contains three main elements - video display area, keypad area, and game panel.

- **Video display area.** The main game and Bonus Game are played in this upper area. In addition, the paytable button and win box are displayed in this area.
- **Keypad.** The keypad shows the current bet level (i.e. number of coins wagered per bet line), the current number of bet lines, the available cash in coins, and the current coin value. This area also contains the main game buttons used to select the bet level, bet lines, coin value, and start the game.
- **Game panel.** The game panel at the bottom houses the buttons for the game settings menu, audio, game rules, and autoplay. This area also displays the player's account information and alternates between showing the available cash, current bet, amount won, and player mode (when in Play for Fun mode).

## Main Game

Players can select the coin value, number of bet lines and bet level before spinning the reels.

- **Game Actions.** The buttons on the key pad perform the different game actions:

	Clicking this button increases the bet level (i.e. number of coins per bet line) by 1.
	Clicking the spin button starts a game round at the current bet level.
	Clicking this button changes the bet level to 4.
	Clicking this button increases the coin value to the next level.

- **Game rounds.** When the player clicks the spin button, the amount bet is debited from the current credit (available coins and cash). The reels automatically come to rest.
- **Game results.** Players win on any of the bet lines. The game highlights which lines are winners and how much has been won on each line. The total winnings are added together and shown in the Win box. The amount won is added to the cash and displays in the game panel.
- **Reel Spin Acceleration.** Anticipation of winning is aroused with a reel spin acceleration that starts when two Scatter symbols appear on the reels, or when the bonus symbol has appeared on reels 3 and 4.

Wild symbol

### Wild Symbols and re-spins

Wild symbols are animated: The 'WILD' is literally going wild and jumps in excitement while in the background the player sees palm trees waving in a summer breeze.

- **Substitution.** Wilds substitute for any other symbol (except Scatter and Bonus symbols) to complete winning bet lines.
- **Re-spins.** 3 or more Wild symbols appearing anywhere on the reels activate 1 re-spin. Additional re-spins cannot be won during a re-spin. A re-spin can result in either winning Free Spins or the Bonus Game, winning both features on a re-spin is not possible.

Scatter symbol

### Scatter symbols and Free Spins

Mega Fortune Dreams™ features Scatter wins and Free Spins.

Game screen, congratulating the player for winning 15 Free Spins

- **Scatter wins.** For each Scatter symbol appearing on the reels during Free Spins, an additional multiplier of x1 or x2 or up to 3 additional Free Spins are awarded. Scatter symbols only award additional Free Spins after the multiplier reaches x10. Scatter symbols appearing on the reels on the final Free Spin only reward additional Free Spins.
- **Free Spins feature.** The Free Spins feature is activated when players get 3 or more Scatter symbols animated with spinning diamonds.
- **Free Spin mode.** Players click the Start Free Spins button to enter Free Spin mode. Free Spins are played with the same bet level and number of lines as the game that triggered the Free Spins. A dynamic sign informs players how many Free Spins remain, and the current multiplier applied to Free Spin wins. This is updated each time the Free Spins feature is re-triggered and new Free Spins or multiplier are won.
- **Free Spin wins.** All wins pay the win multiplied by the win multiplier (3-10) displayed in the game. This excludes bonus game wins and additional Free Spins. At the end of the Free Spins the total winnings are added to the player's cash.
- **Re-triggered Free Spins.** Re-spins can be won during Free Spins. The Free Spins multiplier applies to any re-spin wins won during Free Spins.
- **Bonus Game in Free Spins.** The Bonus Game can be won during Free Spins. Bonus game winnings are not multiplied by the Free Spins multiplier.

## Jackpot Bonus Game

The Jackpot Bonus Game features 3 wheels, and 3 progressive jackpots. The Rapid, Major, and Mega Jackpots takes the excitement to a higher level by increasing the chances of winnings!

The Bonus Game consists of progressive jackpots, where every time the game is played by a player a portion of the bet is added to the jackpot.

The aim of the Bonus Game is to stop the wheel spin so that the pointer rests on an arrow. Arrows progress the player onto even greater jackpot win chances. In this Bonus Game, the player can win either a jackpot or a fixed coin value.

- **Bonus Game trigger.** 3 bonus symbols on an activated bet line start the Bonus Game. **Notes:** Only one Bonus Game awarded per spin. Wilds do not substitute for bonus symbols.
- **Bonus Game start.** When the player enters the Bonus Game, the outer wheel is already spinning. They are instructed to click STOP to stop the wheel. Alternatively, they can wait for the auto stop countdown.
- **Bonus Game finish.** The Bonus Game ends when either a coin value or jackpot has been won. A win presentation screen shows the value of the win. The player must click BACK TO GAME to continue playing the main game.

## Paytable

Main slot winnings are paid out depending on the symbols displayed on a bet line when the reels come to a stop. For a combination of regular symbols to be a winning combination, at least 1 of the symbols must be displayed on the first slot reel, and the remaining symbols must be next to each other on the enabled bet line. The in-slot payable displays the payout for each winning combination.

Mega Fortune Dreams™ features a 6 page paytable. Players click the paytable button to display the first of the six pages; the first page shows the payout and payout rules for the Wild symbols and re-spins.

### Randomisation

#### RANDOM NUMBER GENERATOR (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

#### ALGORITHM FOR A RANDOM REEL POSITION

A reel represents an array of symbols where each symbol has an index ("a position").

1. A random number between 0 (zero) and the length of the reel is acquired.
2. The random number is added to the game as "the new reel position to use".

### Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

### Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
