GAME DESIGN
Neon Staxx™ graphics
Main game

Game Theme and Graphics

Find yourself immersed in the wild 80's with neon colors and great synthesizer music that players definitely will remember.

Neon Staxx™ gives the players an intense game experience with the real excitement coming from all the stacked symbols the game has to offer!

Main Game

Players can select the coin value and bet level before starting the game round.

Game actions

The buttons on the key pad perform the following different game actions:

LEVEL 10	Clicking the left and right arrows increases and decreases the bet level (i.e. number of coins per bet line) by 1. To increase or decrease faster, the player can click and drag the slider below.
(Spin button)	Clicking the Spin button starts a game round at the current bet level and coin value.
MAX BET	MAX BET plays the game at the highest bet level and the current coin value.
COIN VALUE 0.20	Clicking the left and right arrows increases and decreases the coin value to the next level.
AUTO PLAY	Clicking AUTOPLAY automatically plays the game for the selected number of rounds.

The SuperStaxx™ feature

SuperStaxx™

The SuperStaxx™ feature is a stack of symbols that appears on the reels.

In the main game and in Free Spins, stacked symbols can appear on any reel.

All five reels contain a number of adjacent positions that, for every new spin, are randomly replaced with one symbol from the paytable, except for the Scatter symbol.

The randomly selected symbol is visually presented in stacks at the beginning of each spin.

The Wild symbol

Wild Substitution

Wild symbols substitute for all symbols, except Scatter symbols.

Wild symbol substitution pays a winning combination on a bet line according to the PAYTABLE.

The Scatter Symbol

Scatter and Free Spins

3 or more Scatter symbols appearing anywhere on the reels in the main game activate Free Spins according to the PAYTABLE.
3 Scatters = 10 Free Spins

4 Scatters = 15 Free Spins

5 Scatters = 20 Free Spins

In Free Spins, only the Predator symbols or the Wild symbol are randomly selected as the stacked symbol for the entire Free Spins round.

Bet Lines

PAYOUT

Payout Summary

GAME RETURN TO PLAYER (RTP)

- Total: 96.90%
- Main Game: 74.04%
- Free Spins: 22.86%

HIT FREQUENCY

- Any win: 27.63%

WIN INFORMATION

- Main Game: €1 000 / 2 000 coins - on a single bet line
- Main Game: €40 000 / 80 000 coins - max coinciding win
- Free spins: €1 000 / 2 000 coins - on a single bet line
- Free spins: €40 000 / 80 000 coins - max coinciding win

Note: The maximum win of a game round may be higher than the maximum coinciding win, since a game round may include several spins.

PAYOUT RULES IN MAIN GAME

- Bet line wins pay if in succession from the leftmost reel to the rightmost reel.
- A bet line win in coins is equal to the value shown in the paytable multiplied by the bet level.
- A bet line win in currency is equal to the win in coins multiplied by the coin value.
- Only the highest win per active bet line is paid.
- Simultaneous wins on different bet lines are added.

PAYOUT RULES IN FREE SPINS

- Free Spins are played at the same bet level and coin value as the round that activated Free Spins.
- Free Spin wins are added to any bet line wins.
- The total win field includes any wins during Free Spins added to any wins from the round that activated Free Spins.
- Additional Free Spins cannot be won during Free Spins.

Paytable

SUPER STAXX

The SuperStaxx feature is a stack of symbols that appears on the reels.
The randomly selected symbol is visually presented in stacks at the beginning of each spin.

All five reels contain a number of adjacent positions that, for every new spin, are randomly replaced with one symbol from the paytable, except for the Scatter symbol.

In Free Spins, only the Predator symbols or the Wild symbol are randomly selected as the stacked symbol for the entire Free Spins round.

Only the highest win per bet line is paid. Bet line wins pay if in succession from the leftmost reel to the rightmost reel. Malfunction voids all pays and plays. For more information, see the Game Rules.

ADDITIONAL INFORMATION

### Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.
Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.
If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.
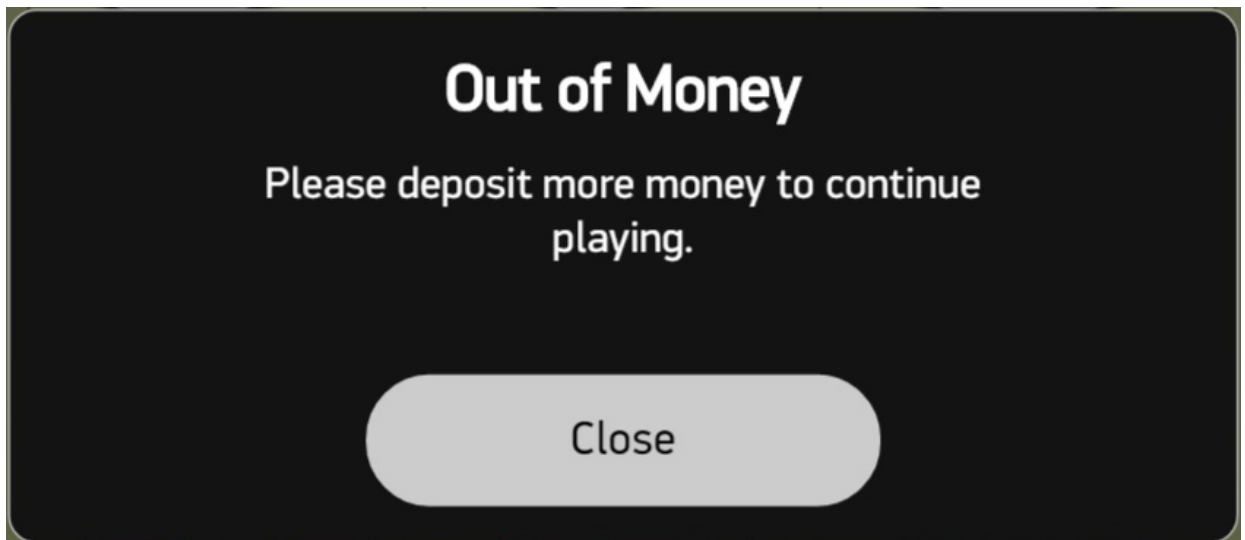

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
