

# PIRATE FROM THE EAST™

Game Type: Video Slot Game

Return to Player: 96.38%

Ahoy! It's time to set sail to the adventurous world of pirates with NetEnt's latest video slot, Pirate From The East™. The game is a 5-reel, 15-line (fixed) video slot featuring Scatter wins, Free Spins, Wild substitutions, and clickable Scatter symbols that allow players to select the Free Spins and multiplier of their choice. The game is set on a pirate ship with its authentic cannons, mast, and sails that takes you to secret locations where hidden treasures abound. So get on deck and collect your gold with Pirate From The East™.

## GAME DESIGN

Wild symbol

### Wild Symbol

Wild symbol substitutes for all symbols except for Scatter symbols. In both the main game and Free Spins, bet line wins with Wild are multiplied by 3.

Wild symbol win

Scatter symbol

Scatter symbol win

Free Spins win

Additional Free Spins

## Scatters and Free Spins

- **Scatter wins:** The main game pays out on 2 or more Scatters. In the main game only, Scatter wins pay total bet x multiplier.
- **Free Spins:** 3 or more Scatter symbols appearing anywhere on the reels in the main game activate Free Spins. Each winning Scatter symbol shows a Free Spin and a multiplier combination. The player must choose one of the win combinations to start the Free Spins round.

The Free Spins are played at the same bet level and with the same number of bet lines and coin value as the game that activated Free Spins.

- **Additional Free Spins.** During Free Spins, each Scatter symbol on the reels awards one extra Free Spin. These Free Spins are automatically added to the current Free Spins.

## PAYOUT

## ADDITIONAL INFORMATION

### Randomisation

#### Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

### Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

### Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

### Game Simulation

A demo version of the game is available at <http://www.netent.com/games/>
