Stacked Wild

Wild Substitution & Stacked Wild

Wild symbols substitute for all symbols except Scatter and Bonus symbols.

The Stacked Wild feature is triggered on the Rise play area when a reel is fully covered by Wilds. The Stacked Wilds are then duplicated onto the Dawn play area in the corresponding position.

Rise Bonus Feature

Rise Bonus Feature

If the Rise Bonus symbol lands on the first reel, the Rise Bonus feature is triggered.

The Rise Bonus feature is an additional coin win that is awarded for every human and ape symbol displayed on the screen except for the Scatter symbol and only appears on the Rise play area.

Dawn Bonus Feature

Dawn Bonus Feature

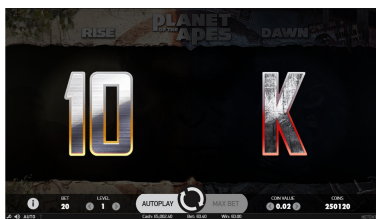

If the Dawn Bonus symbol lands on the last reel, the Dawn Bonus feature is triggered.

The Dawn Bonus feature is a feature that transforms ape and human symbols into the same symbol and only appears in the Dawn play area.

The transformed symbols are only in the Dawn play area.

The selected symbol for transformation is chosen from the ape or human symbols.

The Scatter symbol will not be transformed.

Dual Feature

Dual Feature

Before each spin there is a chance that the Dual feature is triggered. If the Dual feature is triggered, one symbol is chosen for each play area with the same symbol not able to be chosen for both play areas and Wild and Scatter symbols also unable to be chosen.

The reels only contain these two symbols, the rest of the reels are blank spaces.

If a symbol lands in its corresponding play area when the reels stop, it sticks.

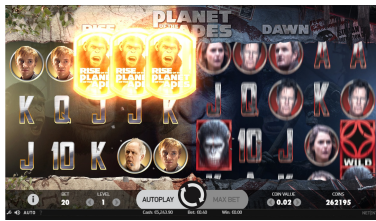

If a symbol lands in the other play area, it transfers over to the correct play area into the corresponding position.

If at least one new symbol appears in its corresponding play area, the game re-spins.

If a symbol lands in the other play area, and the corresponding position is already filled in the correct play area, the symbol cannot transfer.

The game re-spins until there are no more new symbols in either area.

The Dual feature cannot be activated with any other feature.

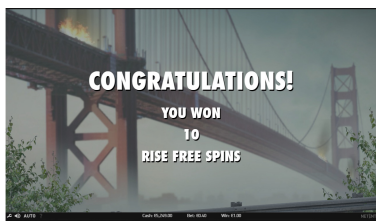

Scatter Wins

Scatter Wins

Scatter symbols on the Rise and Dawn play areas are treated as two separate symbols and counted separately.

The Rise Scatter and Dawn Scatter symbols can only appear in the main game.

Rise Free Spins

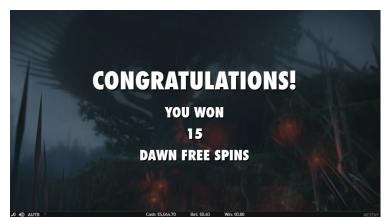

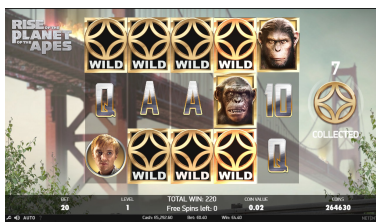

Rise Free Spins

3 or more Scatter symbols appearing anywhere on the reels in the Rise play area activate the Rise Free Spins.

Only the Rise play area is active during the Rise Free Spins.

During the Rise Free Spins the number of Wild symbols that land on each spin are collected in a Wild meter on the screen. Each Wild symbol landing on reels will add to the meter by 1.

On the last spin, after the reels stop spinning (but before any wins are evaluated) all collected Wild symbols are randomly placed on the play area and, once this has finished, the win will be evaluated.

Dawn Free Spins

Dawn Free Spins

3 or more Scatter symbols appearing anywhere on the reels in the Dawn play area activate the Dawn Free Spins.

Only the Dawn play area is active during the Dawn Free Spins.

In the Dawn Free Spins, there are 3 different collect symbols that activate a corresponding meter: Multiplier, Extra Wild and Extra Free Spins.

When a collect symbol lands, it fills the corresponding meter by 1. When the meter is full, it activates a feature with each meter requiring 3 symbols to become full.

The Extra Free Spins meter awards 3 extra Free Spins every time it is filled.

The player starts the Dawn Free Spins with multiplier 1. Each time the Multiplier meter is filled the multiplier is increased by 1, until the x5 multiplier is reached. The current multiplier/Wild symbol will be highlighted on the game screen.

The Extra Wild meter turns one of the human symbols into an Extra Wild symbol every time it is filled for the remainder of the Free Spins.

In the event that either the Multiplier cap is reached or all three symbols have been turned Wild, further instances of the corresponding collect symbol on the reels will instead function as the Extra Free Spins collect symbol.

Extra Wild symbols will substitute for all symbols, except Multiplier, Extra Wild and Extra Free Spins collect symbols.

Multiple Free Spins

Multiple Free Spins

If 3 or more Scatter symbols land on both play areas in the same spin, both Free Spins are triggered and play one after the other starting with the Rise Free Spins.

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

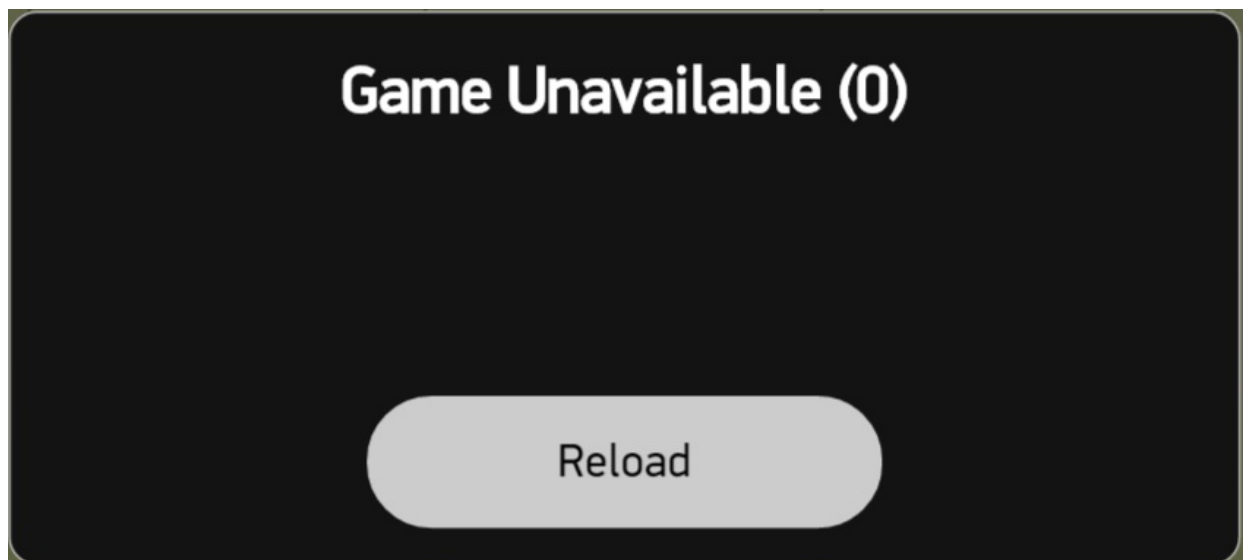

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

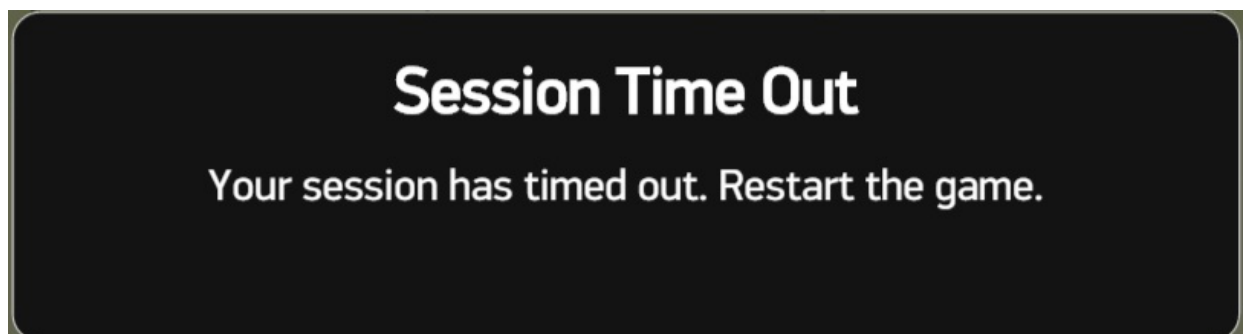

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

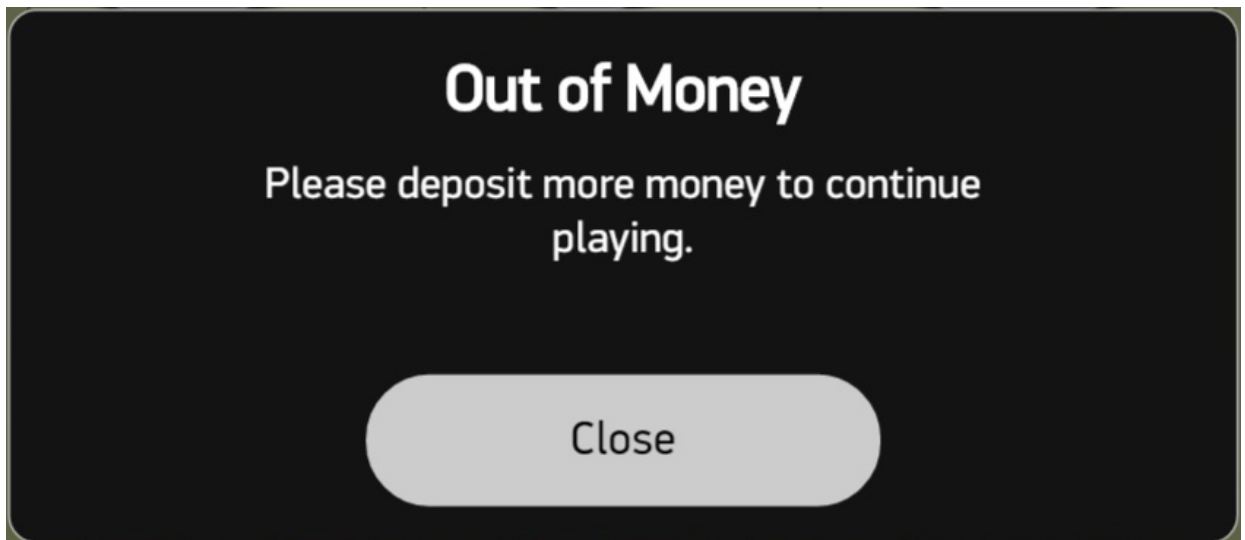

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
