Game Theme and Graphics

The game is set on the surface of the lake. Thus, the player is introduced to a new world, where duck people live their own lives and have their own errands.

The ugly duckling stands out among the fashionable and cool crowd, yet he still turns into a beautiful swan.

The cartoonish style of the game creates a friendly and fun atmosphere.

Stacked Symbols

Stacked Symbols

In both the main game and Free Spins, duck symbols appear as stacked symbols on the reels.

Stacked symbols will be fully or partially displayed depending on how the reel lands.

Any part of a stacked duck symbol included in a winning bet line pays according to the Paytable.

Expanding Wild

Expanding Wild

Expanding Wild symbols can appear in both the main game and Free Spins and will substitute for all symbols except for the Free Spins symbol.

Expanding Wilds can appear on any reel, except for during the Colossal Wild feature, where they land only on reels 1 and 5.

Expanding Wild symbol substitution pays the highest possible winning combination on a bet line according to the Paytable.

Randomisation

RANDOM NUMBER GENERATOR (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
