GAME DESIGN

Main game and Regular Wild

The Wolf's Bane™ is a 5-reel, 3-row, 10-line (fixed) video slot with 4 different Wild features, Free Spins, and a Pick and Click feature.

Regular Wild symbols act as Wild symbols only and substitute for all symbols, except for Scatter and Bonus symbols.

Regular Wild appears in main game and in Free Spins

Pick and Click Feature

The Pick and Click feature is activated when 3 Bonus symbols appear on the reels, in the main game only. The Bonus symbols appear on reels 1, 3 and 5.

The player clicks on one of the Bonus symbols to reveal a coin win.

Only 1 prize is awarded per Pick and Click game.

After the player has been presented with the win, the coin win amounts for the 2 other Bonus symbols not picked are revealed.

The coin win in the Pick and Click game varies between x5 - x50 X bet.

Wild Board

Free Spins

● 3 or more Scatter symbols appearing anywhere on the reels in the main game and in Free Spins activate Free Spins according to the Paytable.
● Before the Free Spins session starts, the Wild Board will appear and select one of 4 random Wild features.
● During Free Spins, an Overlay Wild symbol randomly appears on reels 1-3 in every spin and works the same as the active Wild feature.
● Scatter symbols are counted before any Overlay Wild symbol or Wild feature is activated.
● Each Free Spins session randomly features one of the four different Wild features that can appear anywhere on the reels: Regular Wild, Expanding Wild, X2 Multiplier Wild, Spreading Wild.

Expanding Wild

Expanding Wild symbols automatically expand to cover the entire reel they appear on if resulting in a bet line win.
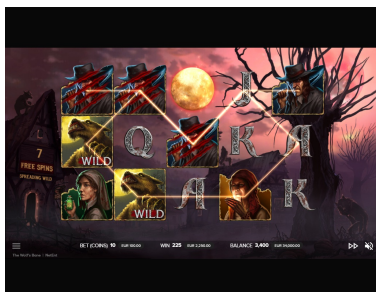

X2 Multiplier Wild

Wins with X2 Multiplier Wild symbols are multiplied x2 when completing a winning bet line.

Spreading Wild

The Spreading Wild symbol turns 1 adjacent or diagonal symbol into an additional Wild symbol.

Bet Lines

WINNING BET LINES

Bet line wins pay if in succession from the leftmost reel to the rightmost reel.

Only the highest win per bet line is paid.

Malfunction voids all pays and plays.

For more information, see the Game Rules.

COIN VALUE	BET (COINS)		WIN	BALANCE
10.00	10		860	5,325
	EUR 100.00		EUR 8,600.00	EUR 53,250.00

ADDITIONAL INFORMATION
Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.
Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.
In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

Game Simulation

A demo version of the game is available at http://www.netent.com/games/
