Game Theme & Graphics

The theater like game theme and opera background score of the Universal Monsters™ The Phantom's Curse Video Slot make players feel a part of this classic tale.

The classic graphics continue in the main game with the Chandelier Scatter symbols, and Phantom Wild symbols.

The game theme continues with the Pick and Click Bonus game. The Pick and Click feature takes the game to another level with the chance to win coins at stage 1 and a multiplier at stage 2. The coin win from stage 1 is multiplied by the chosen multiplier value and paid out.

Free Spins start

Free Spins

During Free Spins, a chandelier hangs by ropes above the reels. Landing of a Phantom symbol on a reel cuts a section of the rope. When all five ropes next to the reels are cut, the chandelier falls and Free Spins end.

Rope cut during Free Spins

The Phantom symbol also acts as a Wild symbol in Free Spins. When a Masked Phantom symbol lands on a reel and cuts the rope section, all Masked Phantom symbols on that reel become fully stacked Masked Phantom symbols from the next spin, and remain stacked, for the remaining Free Spins session.

Free Spins End

Masked Phantom Re-spin

Masked Phantom (Sticky Wild) Re-spin

The Masked Phantom Re-spin is triggered when a Stacked Phantom symbol lands on reel 1 and a Stacked Mask symbol lands on reel 5.

The Bonus Stacked Symbols, as well as Mask symbols and Phantom symbols visible during the spin that activated the Re-spin, turn into Wilds and stick on the reels for one free Re-spin.

Pick and Click Start

Bonus Game (Pick and Click)

The Pick and Click bonus game is triggered when the two Stacked Phantom symbols land on reel 1 and two Stacked Christine symbols land on reel 5.

This bonus game has two stages:

Stage 1 gives you 8 roses with some of them having coin wins in them and some having blockers (a X sign).

Once you land the blocker you go to stage 2 and choose one of 3 mirrors to uncover your multiplier.

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
