VIKINGS VIDEO SLOT™

Game Type: Video Slot Game
Return to Player: 96.05%

SKOL!

It's time to take out your sun compass and set sail with the latest video slot from NetEnt™: Vikings Video Slot™! Based on on the hit TV series, this slot takes players to the brutal Viking period where characters had to use their wits to survive and were answerable only to the gods.

This 5-reel, 3-row, 243 betways video slot features a Hotspot Feature, a Shield Wall Feature, a Raid Spins symbol and a Raid Spins mode including 3 Hotspots. Additionally, in Raid Spins the excitement gets ramped up even more with the game changing to a 7-reel, 5-row, 78 125 betways reel area.

Now it's time to join your favorite Vikings character and plunder the reels for your fortune!

Game Sheet Version: 1.1

GAME DESIGN

Hotspot Feature activated

Scatter Pays win after Hotspot

Hotspot Feature

Vikings Video Slot™ includes a Hotspot Feature in the main game. If a fully stacked Viking symbol lands in a Hotspot, all other Viking symbols on the reels turn into that symbol! And even better, all subsequent wins are Scatter pays!

Shield Wall symbols appear on the reels

Symbols are then transformed into a mystery symbol

Shield Wall Feature

In both the main game and in Raid Spins, the Shield Wall appears as a cluster of mystery symbols that appear on random areas of the reels.

3 Raid Spins symbols on the reels activate Raid Spins

There are now 7 reels with 78 125

Raid Spins

If you are lucky enough to activate Raid Spins, the fun really starts! The reels expand to become 7-reel, 5-row, 78 125 betways, and instead of just 1 Hotspot there are 3!

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

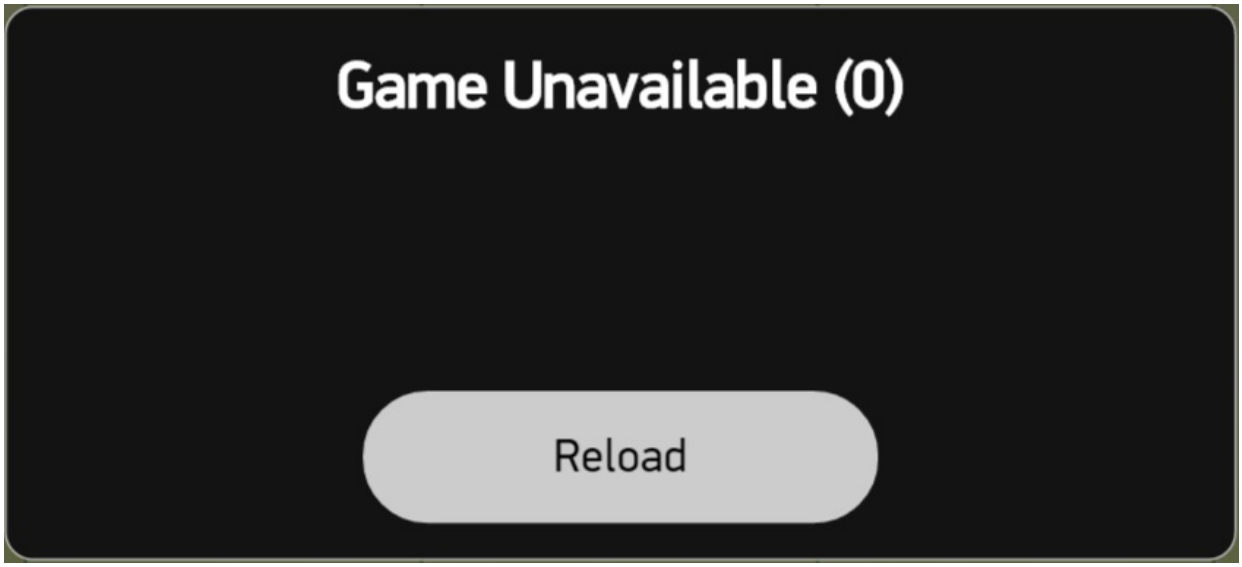
The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

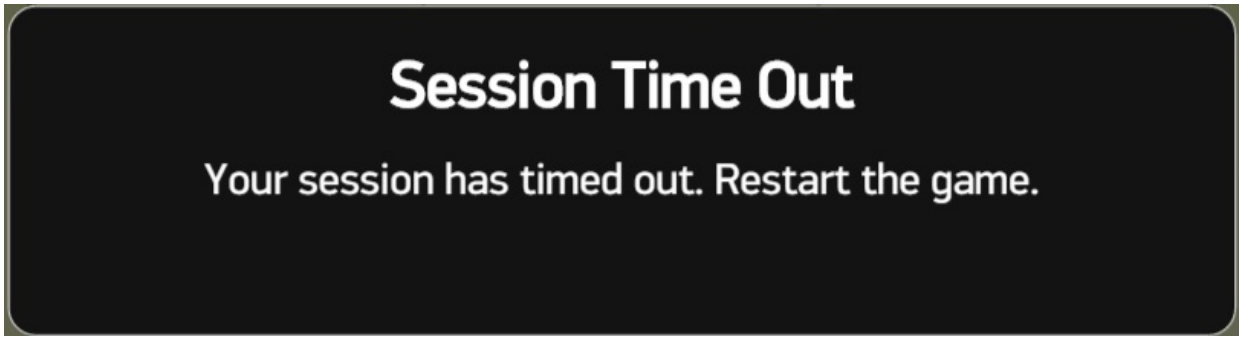
Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.



If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.



In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

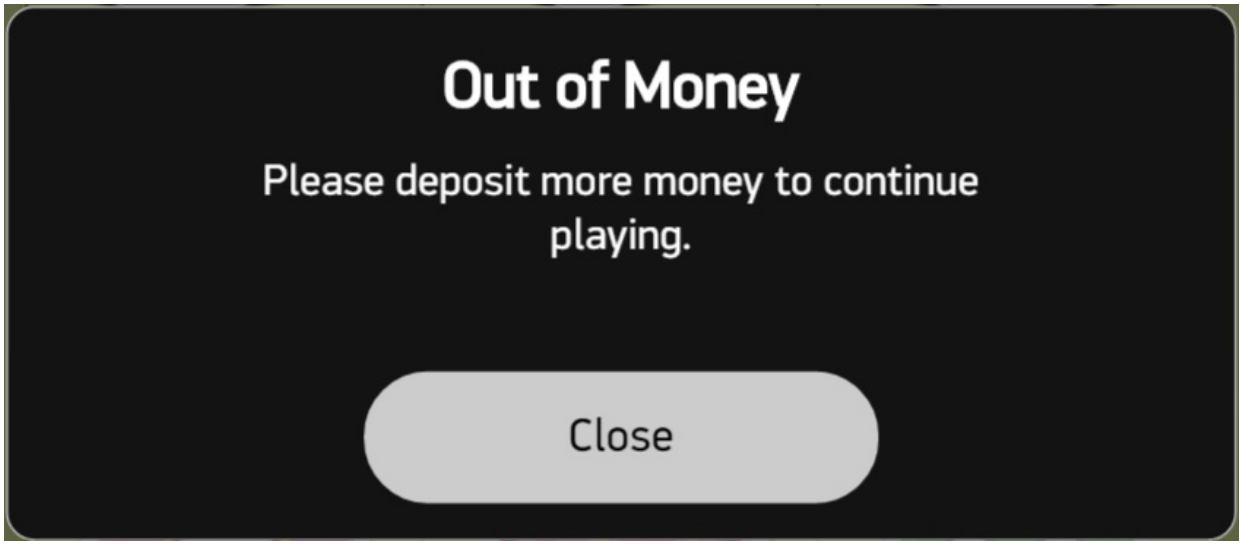
Any unauthorised publication, copying, lending or reproduction is strictly prohibited.



(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

Game Simulation

A demo version of the game is available at http://www.netent.com/games/
