Wild symbol win

Scatter symbol win

Free Spins

Additional Free Spins

Free Spin Win

Sticky Wilds

Wild Substitution and Scatter Symbols

Wild symbol substitutes for all symbols except for Scatter symbols. Scatter symbols does not appear during Free Spins.

Scatter wins are paid independent of bet line wins. Scatter wins pay total bet multiplied by the payout displayed in the Paytable.

Free Spins

When 3 or more Free Spins symbols appear anywhere on the reels in the main game, the player wins 12 Free Spins. Free Spins are played at the same bet level and coin value as the round that activated the Free Spins.

- **Additional Free Spins:** During Free Spins, when at least one Sticky Wild symbol appears on every reel, the player wins 5 additional Free Spins. Additional Free Spins can be won once per Free Spins session.
- **Free Spins Wins:** Bet line wins during Free Spins are doubled (x2). At the end of Free Spins, the total win from Free Spins is added to any wins from the round that activated Free Spins.

Sticky Wilds

Wild symbols transform into Sticky Wild symbols during Free Spins. Sticky Wild symbols hold their positions on the reels until Free Spins ends.

If the player wins additional Free Spins during the Free Spins session, the Sticky Wilds will remain stuck throughout the additional Free Spins.

PAYOUT

Payout Summary

GAME RETURN TO PLAYER (RTP)

- Total: 96.82%
- Bet lines in main game: 53.7%
- Scatters in main game: 17.4%
- Bet lines in Free Spins: 25.7%

HIT FREQUENCY

- Any win: 30.4%
- Any bet line win: 24.4%
- Any Scatter win: 7.1%
- 3+ Scatters (Free Spins): 0.66%
- Additional Free Spins: 2.2%

MAXIMUM PAYOUT

- Main Game: €45 000 / 90 000 coins - on a single bet line
- Main Game: €45 200 / 90 400 coins - max coinciding win
- Free spins: €6 000 / 12 000 coins - on a single bet line
- Free spins: €54 000 / 108 000 coins - max coinciding win

Note: The maximum win of a game round may be higher than the maximum coinciding win, since a game round may include several spins.

Paytable

WHO'S THE BRIDE™

WHO'S THE BRIDE?

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

Game Simulation

A demo version of the game is available at <http://www.netent.com/games/>
