Game Theme & Graphics

The soothing sound and colorful graphics of Wild Turkey™ are really magical. The game is set in a valley of remote mountains, where a tribe of indigenous Turkeys reign.

The game has different backgrounds for main game and Free Spins. In the main game, players enjoy a bright sunny and relaxing background with the mellow beat of drums.

In Free Spins, the day turns into night. The Free Spins intro screen sets the sun beyond the mountains and brings players to a scene where the Turkeys are gathered around a bonfire, the rhythmic beat of drums intensifies and Free Spins round begins.

Wild Symbol

The Wild symbols appears on any reel in the main game and substitute for the highest possible winning combination on a bet line. In addition, 3 Wild symbols appearing anywhere on the reels activate 15 Free Spins, 4 Wild symbols activate 30 Free Spins, and 5 Wild symbols activate 60 Free Spins.

Free Spins Reels

Stacked Wild Symbol Win

Additional Free Spins

Stacked Wild Symbols in Free Spins

Free Spins in Wild Turkey™ features a Stacked Wild symbol that substitutes for all symbols in Free Spins and pays the highest possible winning combination on a bet line.

The Stacked Wild symbol can appear as a single symbol, or a Stacked Wild of 2 or 3 symbols.

During Free Spins, when a Stacked Wild symbol covers the entire reel it appears on, 2 additional Free Spins are awarded to the players.

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

Game Simulation
