HOW TO CALCULATE PAYLINE WINS

To calculate your total payline coin win, calculate all payline wins and add them together.

1. To calculate a single payline win, count the number of identical symbols lined up in sequence on the line. If the payline pays from left, then start counting from the far left. If the payline pays from right, then start counting from the far right.
2. If three or more identical symbols lined up, find the coin win value in the Pay Table. There you can for all symbols find the value for 3 in a row, 4 in a row, and 5 in a row. Only the highest winning combination per line is paid out.
3. Calculate the total win in your home currency by multiplying the total coin win with your coin value.
